Clear Advantages

Cashiers are able to verify banknotes with magnetic protection at the speed of 1500 banknotes/min. without error.

Sensors can be calibrated to detect a currency with the push of a button. Any other currencies will be counted, but not authenticated

The counter set comes with an external display and an external 10-x magnifying lens with backlight. Magnifier can be powered by the counter or batteries

5 kinds of detections at an affordable price.
Individual loads of up to 500 banknotes.

PRO 85^{SERIES}

5 kinds of detections at an affordable price. Individual loads of up to 500 banknotes.

ADVANTAGES

- Reliable construction
- Enlarged hopper and stacker for banknotes
- Places banknotes evenly in the stacker
- Sound indication of operations
- Manual and automatic starting modes
- Adjustable sensitivity of UV sensors*
- CDF filter precisely calibrates internal sensors to the specific currency to be counted
- Dust cover for the counter
- External display kit

* PRO 85 U, PRO 85 UM

FUNCTIONS

- Counts banknotes
- Summation mode
- Size detection and optical density detection
- UV detection*
- Magnetic detection**
- Summation mode and Batch mode
- Checks micro-features on the banknote with 10x magnification in white light (by using the magnifying lens).
